INCOME TAXATION

DECIDED UPON BY THE DEMOCRATIC TARIFF REFORMERS.

Both Individuals and Corporations to be Called Upon to Make up the Deficit in the Revenues-The Tax Upon Whicky to be Increased Ten Cents Per Gallon. Congressman Oates' Coinage Scheme, Public Debt.

WASHINGTON, Jan. 2.—The advocates of the individual income tax proposition were triumphant at the final meeting of the Democratic members of the ways and means committee this afternoon at the treasury department. But little time was wasted in discussion, The issue was joined on two propositions—one to levy a tax of 2 per cent on individual incomes over \$4,000 and against incomes from corporations (that is, the difference between the gross income and the operating expenses, or, in other words, the net incapanes, or, in other words, the net income), and a proposition offered as a substitute by Mr. Cockran to tax incomes from corporations I per cent and inneritances 5 per cent, to place an additional tax of 10 cents on whisky, and to restore sugar to the dutiable list at 14 cent per pound.

The vote on Mr. Cockran's substitute

The vote on Mr. Cockran's substitute was taken first, and resulted in its defeat by a vote of 7 to 4. The nays were Messrs. McMillin, Turner, Whiting, Bryan, Byunm, iarsney and Breckinridge. The original proposition was then submitted, and carried by a vote of 6 to 5. The nays were Messrs. Wilson, Cockran, Stevens, Montgomery and Breckinridge.

It was decided, in connection with the latter proposition, to increase the whisky tax 10 cents per gailon, that is, from 90 cents to \$1, to be levied against whisky in bond as well as out of bond. Upon the representation that this would work undue bardship to the owners of whisky in bond, it was decided to extend the bonded period from three to eight years.

THE GENTLE MANATEE. Large Specimen of the Seacow Recently

The manatee, or lamantin, of which there are two species, inhabits the African or American continents. These creatures browse upon aquatic vegetation of the shallow lagoons and great rivers. The animal in our illustration weighed 16 cwt. 10 lbs. and was 10 feet 2 inches in length; the baby being about a third this size. Unfortunately, as the mother was being got into the tank prepared for it, she expired. The young one appeared all right until some days ago when it also died. The mother was presented to the Zoological society of London by Sir Henry Blake, governor of Jamaica, and was

An Inexplicable Mystery.

THE ISLAND OF HAYTL

Desolation of a Once Wealthy and Powerful Republic.

A Nation That Is Incapable of Self-Gov erament-The Rulers Are Bloodthirsty Tyrante and the People Hate White Men.

Not the least interesting feature of the place is the barracks, where is quartered a portion of Hippolyte's valiant army, says a Hayti correspondent of the Providence Journal. The only attempt at uniform is a suit of blue overails, generally in the last stage of dilapidation, and a cap ornamented with red, yellow or blue braid, accord-ing to the fancy of the wearer. Some few have shoes or straw slippers, but the majority are barefooted.

They are armed, however, with fairly good muskets, and many of them carry ugly looking knives. I saw large numbers of the "soldiers" on the plaza or public square, some playing at dice or cards, some talking others sleeping and all lazy dirty and ragged. This plaza, which was originally well laid out and which actually boasted an ancient fountain in the center, was littered with refuse, rooted up by hogs, and filthy with house offal and dung. The ancient paved walks which origin ally traversed it were badly broken and the loose stones were wildly scat-

tered by the hogs.
Outside of the town and as far as the eye can reach extends a hilly country overed with forest. In a long tramp through this country we saw no cul-tivated land. And yet this land is said to be extremely fertile and to yield largely any tropical product that is planted upon it. From an examination of an outcropping ledge of rock I decided that the soil was underlaid with limestone, and such a soil is nearly always But the richness of this island is wasted. For even the old plantations, which were well set with coffee. oranges and cocoanuts, are grown up to tropical forest and yield next to nothing

Right in the midst of a jungle of wild trees and bushes I found traces of an old orange and mango grove, indicated by the remains of straight rows in which these trees were originally planted. And with the decline and ruin of the plantations has declined everything in connection with them. Even the old carriage roads which originally traversed the island and formed a channel for conveying the produce to the ports are now only bridle paths, being completely over-grown with forest and bushes. And this is Hayti, the Hispaniola of Columbus, the pride and glory of the great admiral! For it will be remembered that, after examining the other large islands of the West Indies, Columbus decided that this one was the richest and best. And later, when under French rule, it was one of the fairest and wealthiest spots in the civilized world.

The whole republic, in fact, is a gigantic farce. No nation has ever shown itself more utterexceptions, grow up in absolute ignorance, and with a deep, inborn hatred of the white man. The rulers are bloodthirsty tyrants and the country has degenerated into a tropical wilder-

GREAT ENGINEERING FEAT.

Height of a Chimney Increased Without Stopping Factory Work. A remarkable feat has been recently accomplished at the Bonsecour spinning works at Nancy, says Industries and Iron, namely, increasing the height of a chimney about one hundred feet high by about thirty feet, without stopping the work for a single day.

Owing to the power being increased the existing chimney did not have sufficient draught for the existing number of boilers, and one of two alterations had to be faced-either to build a new chimney alongside the old one, or to increase the height of the latter. Augustus Bartling, of Bernberg (Anhalt), offered to increase the height of the old chimney without interfering

with the work of the mills. Aided by another man, whose agility and nerve were equal to his own, Mr. Bartling fixed a series of light steel ladders to the chimney by means it has of sitting up in the water and of iron hooks driven in between the suckling its young. This was the courses of the bricks, erected a pulley largest specimen ever seen in England, at the top of the chimney and a flight and it will be a long time before they of scaffolding all round, and then having lowered the cornice surmounting chimney, they built on to the top at the rate of about four to five feet per

The whole work occupied eight days, and was perfectly successful. While this is the first chimney dealt with in this manner in France, Mr. Bartling states that he has carried out similar operations in Germany, at the chemical at Thann, and at the works at the Mui-

house Gas company.

MUSIC IN WALES.

Meledy Is the Very Soul and Lernel of the Weish Nature.

Every church and chapel in every Welsh village and town, according to the Westminster Review, has its choir, often numbering sixty, seventy or a hundred voices, and every choir has its musical prodigies, leaders of parts, mayhap, who have never had a lesson in music in their lives, or some un colliers or tip-girls, with voices which, had they been trained and developed, might have made of them Edward Lloyds or Antoinette Sterlings. District after district has its "united choral union," which will take up the study of some work of the great masters and deliver it at an annual concert or Christmas festival; not in the pale, flickering, dispassionate style which is so characteristic of some Eng-lish choirs, but with rugged fire and

intensity. I have had the good fortune to hear the greatest oratorios rendered under the most brilliant conditions that talent and culture could produce in this the most talented and cultured of all metropoles, but I have never heard the majestic roll of the Hallelujah chorus or the matchless melodies of the "Elijah" rendered with such soul and verve and eloquence as by an obscure "united choir," led by a workingman in a mining village among the hills of

Glamorgansnire. Rough, if you will; ruggedly vehe ment and impetuous, but rough with the roughness of unpolished genius, impetuous with the impetuosity of mountain torrents. The force of it. the emotional fervor, the richness of vol me, the tone and timbre in itthese are things not to be forgotten The same qualities in a lesser degree may be observed in the singing of and small chapel choir inside the boundaries of Wales. You shall never hear such singing as you may bear on quiet Sunday evenings from some Welsh hillside sanctuary by a choir of working lads and lasses, conducted by some rough-and-ready, unkempt, self-

taught musician. Music, then, we assert, is the very oul and kernel of the Weish nature. A musical ear is the national birthright. Every Welsh preacher who migrates to an English church finds the greatest difficulty in abstaining from that weird, peculiar intonation of his sermon which is known as the hwyl, and which is often strange and objectionable to English ears.

Another remarkable and subtle fact which will be interesting to English readers and at the same time significant of the sensitiveness of the Welsh musical ear, is that it is positive discord to many among the Welsh congrethe first verse of the hymn, does not so pitch the voice that it shall be in harony with the key in which the tune has preliminarily been played by the Instrumentalist
